

## **Autosegmental-Metrical Theory II**

*Amalia Arvaniti & Janet Fletcher*

6 September, 16:30-18:30

In this lecture we will continue our exploration of AM. We will start with a Q&A to address any questions that arose from the material covered in the earlier lectures and the working session of the day. We will continue by providing more detail about topics such as intonation and meaning in AM, relation between AM and ToBI systems, variation in intonation, and cross-linguistic differences.
